

**NEW Product Release with Ability to Bond Low Surface Energy**

Durham, NC – October 31, 2023 – IPS Adhesives, a global manufacturer of structural and surfacing adhesive products, today announced the launch of SG400LSE, a two-part translucent, methyl methacrylate adhesive (10:1) product that can bond many low surface energy plastics including polypropylene and polyethylene **without surface treatment**.

“I am excited that this product brings solutions and true innovation to our customer,” said Scott McDowell, IPSA President. “SG400LSE is a revolutionary adhesive that solves the challenge of bonding low surface energy plastics without the need for time-consuming and expensive surface preparation. This opens up new possibilities for engineers, and allows them to create stronger, lighter, and more durable products.” SG400 is ideal for a wide range of applications, including:

Recreation

Transportation

Electronics

Sign & Display

Wind

SG400LSE is available now through IPSA’s global distribution network. For more information, please visit [scigripadhesives.com](https://scigripadhesives.com), or visit IPSA at the Composite and Advanced Materials show in booth #J29.

**About IPS Adhesives**

SCIGRIP is a brand of IPS Adhesives, a leading provider of adhesives serving the surfacing, structural and assembly industries. With a combined 65 years of expertise in research and development, our products are recognized by OEM’s and fabricators globally for their premium quality, strength, and reliability. IPS Adhesives has three state-of-the-art manufacturing facilities on two continents and a broad network of distributors serving countries worldwide. Visit [ipsahesives.com](https://ipsahesives.com) for details.
